

Product-Teardown

DHAN APP

Online Stock Trading and Investing Platform
for India

धन

PROBLEM STATEMENT BREAKDOWN

Problem Background

◦Trader-Centric Image:

Dhan's success with traders creates a barrier to attracting long-term mutual fund investors.

◦Untapped User

Potential: Dhan has a large existing user base (traders) who could be converted into mutual fund investors.

User Perspective

1. Current Users:

- Focus: Short-term trading gains.
- Perception: Trader-centric platform.

2. Potential Long-Term

Investors:

- Needs: Stability and growth.
- Expectations: User-friendly mutual fund options and long-term planning tools.

Problem Statement

1. Repositioning:

- Objective: Shift Dhan's image to accommodate long-term investors alongside traders.
- Focus: Emphasize suitability for long-term stock investments and expand mutual fund offerings.

2. Mutual Fund Growth

Target:

- Goal: Attain over 1 million mutual fund investors on Dhan within 12 months.

THE COMPETITION

	Dhan	Upstox	Growww
Funding	\$15M	\$220M	\$393M
No. of users	4,69,961	5 million	9.5 million
Tracxn Score	46/100	76/100	79/100

Dhan, established 1.5 years ago, lags behind competitors, but the short time frame indicates the trust they've built with users.

USER PERSONAS

Name: Akash 🧑

Age: 28 🎂

Occupation: IT Professional 💻

Income: ₹15,00,000 💰

Experience: 3 years 📈

Trading Style: Short-term Trader 📊

Attributes

Success Metrics

Virtual trading contest	Smart Trade Exit Assistant	Community
Number of Participants: 📈 Measure total registrants and active participants in virtual trading contests. More participants = higher user engagement and interest! 🎉 📊 🔥	User Adoption Rate: 📊 Measure the percentage of active users utilizing the Smart Trade Exit Assistant for trades. Higher rates = greater feature adoption! 📈 🔥 🔍	Content Creation and Sharing: 📄 Count articles, blogs, research reports, tutorials, and other content created and shared by users. 📝 📊 🌐
Retention Rate: 📊 Calculate the percentage of participants who stay active in future contests or on the platform post-contest. High retention = user satisfaction and ongoing engagement! 😊 🔄 📈	Exit Signal Effectiveness: 📈 Evaluate the success rate of exit signals from the Smart Trade Exit Assistant by comparing trade outcomes (profit, loss minimization) against benchmarks. 📊 ✅ 📁	Community Growth: 📈 Number of new users joining the community over time. 🎉 👥 ✨
Prize Redemption and Recognition: 🎁 Track prize redemption rates and rewards for top participants: virtual badges, trophies, bonus funds, and real-world incentives. 🏆 💰 ✨	Cost-Efficiency Improvement: 💰 Compare trading costs (brokerage fees, transaction costs) before and after using the Smart Trade Exit feature. Lower costs or better cost-to-profit ratios = improved efficiency! 📊 📈 ✅	Retention Rates: 📊 Percentage of users who stay active over time. 😊 🔄 Churn Rates: 📉 Percentage of users who stop participating. 📄 ✖

Go To Market Strategy

Preparation & Research:

 Market research on stock trading  Analyze competitor features  ♂ Content & social media plans  Partner with financial influencers.

Launch Planning

 Optimize app store presence  Create PR materials  Plan social media blitz  Collaborate with influencers  Offer sign-up bonuses.

Execution

Implement real-time updates  Distribute press releases  Engage users on social media  Showcase influencer testimonials  Provide discounts.

Post-Launch Engagement:

 Guide users through tutorials  Cultivate trader community  Analyze user data  Launch retargeting campaigns  Offer 24/7 support.

Analysis & Iteration:

 Monitor engagement metrics  Collect feedback  Stay updated on trends  Iterate on features  Refine strategy for growth.
